### Title of Best Practices I

#### RGCOE Special Scholarship Scheme

The focus of the educational system nowadays is the student. The primary goal of the RGCOE is the student's overall improvement. In order to meet these needs in accordance with its social obligations, the RGCOE launches the "Student Adoption Scheme" for all engineering specialties, from the second to the fourth year of study. College students are financed under this scheme to continue their study in accordance with their financial circumstances.

**Objectives:** To provide financial assistance to needy and meritorious students. To offer financial assistance to students in the EWS, OBC, General, and NT categories to meet the students' academic goals. To consider these students' feedback and adjust the structure as needed.

**Context:** The government assists students who need assistance financially with a number of scholarship initiatives. RGCOE introduced the 'RGCOE Special Scholarship Scheme' in 2018 in addition to its ongoing scholarship schemes. The school helps kids from low-income families financially so they can pursue their goal of providing education for all.

**The Practice:** The procedure is to award scholarships to students on the basis of their merit and needs. When applying for the scholarship, the student justifies his or her financial necessity. A committee submits a recommendation regarding the students to the office after deciding they are worthy of a scholarship. Students receive financial help according to their needs.

**Highlights:** Institute has provided scholarship of Rs.1280000 during last five years.

**Evidence of Success:** Following the adoption of this technique, the percentage of students dropping out due to a lack of resources has dropped, and the successful measures result in a success rate for students across the curriculum. This programme helped students whose financial circumstances prevented them from finishing their degree. So far, this scholarship has helped a lot of students.

**Problems Encountered and Resources Required:** Following the adoption of this technique, the percentage of students dropping out due to a lack of resources has dropped, and the successful measures result in a success rate for students across the curriculum. This programme helped students whose financial circumstances prevented them from finishing their degree. So far, this scholarship has helped a lot of students.

## Title of Best Practices II

### School Connect Program for Promoting Technical Courses to Rural Area Students

RGCOE is situated distant from Ahmednagar City, it is a remote place. The remote areas where students live, such as Bhalavani, Takali Dhokeshwar, Wasunde, etc., are reached by the contemporary educational system, and all students receive counselling for everything from basic education to higher education based on their individual needs. During a promotion activity, the campaigner establishes an emotional and mental link with the student in order to promote education in society.

#### Objectives:

- Promoting Modern and Basic Technical Education to Students in Rural Areas is the Goal.
- Counselling Services for Undergraduate and Graduate Students.
- The Learning Process Is Quite Simple.
- The goal of implementing this technique is to encourage society's transition from basic to higher education.
- Students who have an education are more likely to have improved social and economic standing.

#### Context:

Since the founding of the RGCOE college, the college has been dedicated to advancing education in rural areas. The goal of basic education is to address a child's fundamental needs and interests in learning. Gandhiji's basic education programme was designed to teach student's skills that would help them handle problems related to their livelihood and foster the traits of good citizenship. Low family income, early marriage, ignorance, and a lack of support from parents are the main causes of rural students' post-secondary school and college dropout rates in Maharashtra.

#### The Practice:

Under this School Connect Programme, our group of staff try to reach maximum number of SSC and HSC students to spread awareness related opportunities available after pursuing technical education. By visiting school we are identifying the needy and bright students for our college level scholarship scheme.

Hostel Facility: College helps to increase awareness regarding various government schemes available for tribal students.

#### Evidence of Success:

Matoshri Shaikshanik Pratishthan's

The circumstances have significantly improved as a consequence of the college's efforts. The community at large has adopted a positive attitude towards the students' education. There has been a rise in the number of students enrolling from their villages, including Wasude, Karjule Harya, Bhalavani and Parner. The proportion of high school and college graduates in this particular town who did not pursue further education after leaving school was relatively high. Parents are being encouraged to send their children to the school or college of their choice.

**Problems Encountered and Resources Required:** Facing the parents of the isolated and educationally underprivileged areas was a challenging quest. To spread the word about the value of education for children, the institution send teams of teachers to visit nearby schools and rural towns. Teachers tried to convince village elders and sarpanches—the head of the Gramme Sabha—to send their students to school or college by having conversations with them. For a number of reasons, the parents first forbade their child from attending. The challenges were identified, and the resources required to remedy them were identified. Furthermore, a bus was acquired on a rent-to-own basis, and the means of transportation were made available.
